Connor Panish

Curriculum Vitae

cp732@cornell.edu
panish.connor1@gmail.com

Education

PhD, Statistics *2025–2030*
Cornell University, Ithaca, NY

- **Advisor:** Ahmed El Alaoui
- **Research Interests:** high dimensional statistics, statistical physics and computational-statistical tradeoffs. Currently working on sampling problems in spin glasses.
- **Classes General Topics:** Probability Theory, Stochastic Processes, Statistical Theory, Computational Statistics, Advanced Optimization

Bachelor of Science, Mathematics and Statistics (Double Major) *2021–2025*
University of Florida, Gainesville, FL

- **UF CLAS Excellence Award** (2025): awarded to 4 out of 8,000 graduating seniors, recognizing outstanding contributions during undergraduate years
- **Dean's List** (2021–2025)
- **Involvements** UF Math Society President, UF Disability Ambassadors President, UF Student Government Senator (two years), President of Independent Student Government Political Party, UF Budget and Appropriations Committee Member
- **Courses include:** Graduate level Functional Analysis, Complex Analysis and Algebra.

Funding Awards

2025–2028 **NSF Graduate Research Fellowship**: 3 years of support from the National Science Foundation (about $150,000)

2025–2027 **Cornell Graduate Deans Scholar**: 2 years of fellowship support for demonstrated academic excellence

2021–2025 **Deb Richard Foundation Scholarship** ($15,000): recognizes academic merit of students who have had physical disabilities since birth

2021–2025 **Theodore and Vivian Johnson Scholarship** ($8,000): recognizes academic merit of students with disabilities attending a university in Florida

Papers and Preprints

[1] Erik Brodsky, Eva Engel, **Connor Panish**, and Lillian Stolberg. Comparative Analyses of the Type D ASEP: Stochastic Fusion and Crystal Bases, 2026. **Published in SIGMA**. Volume 22, article number 95.

[2] Kimberly Affeld, Christian Dean, Matthew Junge, Hanbaek Lyu, **Connor Panish**, and Lily Reeves. Four Parameter Coalescing Ballistic Annihilation, 2024. **Published in Journal of Statistical Physics**. Volume 191, article

number 89.

[3] Henry Adams, Armando Albornoz, Glenn Bruda, Jianda Du, Lodewyk Jansen van Rensburg, Alejandro Leon, Saketh Narayanan, **Connor Panish**, Chris Rugenstein, and Martin Wall. Gromov-Hausdorff Distances Between Quotient Metric Spaces, 2024. **Preprint**, arXiv:2410.14938.

Conferences

Aug 2026 Summer School in High-Dimensional Probability and its Applications, Northwestern University

Oct 2024 AMS Fall Eastern Sectional Meeting, University at Albany

Aug 2024 Young Mathematicians Conference, Ohio State University

Jan 2024 Joint Mathematics Meetings, San Francisco

Talks

Oct 2024 *Stochastic Fusion on Type D ASEP* at AMS Fall Eastern Sectional Meeting based on [1]

Jan 2024 *Coalescing Ballistic Annihilation* at JMM based on [2]

Aug 2023 *Coalescing Ballistic Annihilation* at Young Mathematicians Conference based on [2]

Sep 2022 *The Art of Voting* for UF University Math Society on explaining and proving Arrow's Impossibility Theorem

Membership/Service

Mentor Cornell Directed Reading Program (2026-present)

Mentor MAC Doctoral Peer Mentoring (2026-present)

Contributor Art Exhibition, Cripping Time Across Realities see here (2026)

Mentee MAC Doctoral Peer Mentoring (2025)

Member Statistics Graduate Student Association (2025-Present)
